# Array

Design by Umut Yamac.

A striking pendant of impressive proportions, Array is an exploration of thread and its potential to create lightweight and dynamic sculptures of light.

Composed of an array of fine technical threads pulled taut between two aluminum rings, Array presents a wide range of conical and cylindrical silhouettes that can be combined together to form a compelling installation.

The spacing distribution of the threads creates translucency and volume, whilst the layering effect gives the illusion of movement. Suspended overhead, Array emits a pleasant downlight projected from an invisible source concealed within the lower ring.

At the same time, indirect light washes upwards in a gradient of colour, enveloping rather than invading the space it occupies.

# Lily

Design by Ludovica+Roberto Palomba.

The simplicity of Lily's refined silhouette makes this fixture ideal for an elegant interior with a relaxed ambience. Suspended from a high ceiling or positioned strategically about the room, its graceful glass diffuser radiates brings a sense of warmth and wellbeing.

# Dama

Design by Ludovica+Roberto Palomba.

Dama is a homage to the classic lamp, ideal for shaping an intimate atmosphere with an elevated aesthetic. Combining technical quality with a layer of warmth and intimacy, the collection connects the charm of tradition with the finesse of contemporary lighting design.

Cutting-edge invisible technology allows Dama's circular light source to radiate with a gentle, uniform glow from within. Suspended from a micro-thin cable that's almost invisible to the eye, the pendant exhibits an ethereal quality, its graceful silhouette looming overhead.

# Knit

Design by Meike Harde.

Light, materiality and tangibility collide with the Knit collection. Its texture is magnetic, calling out for us to touch its surface, to feel its warmth and to keep it close. Light seeps outwards through the fabric transmitting a soft 360° glow.

While the urchin, a symbol of fertility, conceals a soft inside beneath its protective outer shell, Knit delights in the femininity and softness of its outer layer. It exudes intimacy, comfort and familiarity.

# Circus

Design by Antoni Arola.

Circus is defined by its minimalist structure and signature conductive bar, delicately balanced by opposing elements to create a festival of light. A creative toolkit full of possibilities to explore and enjoy that offers total freedom of composition, multiple components and a myriad of diffuse and accented lighting effects.

Its structure is developed both vertically and horizontally and combines volumetric diffusion effects, hide diffusers, spot and indirect lighting. This system turns the professional into a composer of atmospheres, where object luminaires can be combined with functional elements.

Suspended from the ceiling and positioned at any angle, the discs reflect rather than emit light. Lustrous and ethereal, these halos cast spherical shadows evocative of a circus performance or lunar eclipse when positioned above a spot.

Suspended in parallel to form an equilibrium or poised in asymmetrical harmony, the slender and distinctive bar amplifies the possibilities for shaping a space. Whether composed independently, as a pair or fixed to the ceiling, it conducts electricity and transports light to different points of interest, creating a visual hierarchy within the space and between the surrounding objects.

Circus offers a variety of fixtures that can be built into the conductive bar, suspended from a track or hung directly from the surface of the ceiling. The bar amplifies the possibilities for shaping a space by conducting electricity and transporting light to wherever it is needed.

With a choice of black (11) or beige (24) finishings and dimming control, Circus offers a variety of fixtures that can be built into the conductive bar, suspended from a track or hung directly from the surface of the ceiling. With a traditional light rail the connection is visible from below, but with Circus, the luminaires can be connected to the bar from above, sealed with a cover and with pendants passing seamlessly through the lower section. This innovation has a significant impact on the aesthetic purity of the design.

Accent Spotlight

Accent Downlight

Suspended from the ceiling and positioned at any angle, a range of reflector discs reflect diffuse light from a spot angled towards them. Lustrous and ethereal, they cast a spherical shadow on the adjacent surface like a lunar eclipse.

- 11 Black  
(Bottom face: White / Top face: Black)

Reflected Light

LIGHT REFLECTOR

Dynamic light

Dynamic light allows professionals to play with subtle degrees of intensity and colour temperature to recreate a subtle ambience for every scene within a lighting project

A source of emotion

Static, tunable white and tunable red

Designing an atmosphere of wellbeing is based on two main axes: **space** and **time**. The axis of time implies the concept of dynamic light .

Atmosphere design is intentional, depending on the **design of different scenes according to the specific use of a space** as it evolves throughout the day. Light is dynamic because ambience also depends **on the time of day** and on the influence of the natural light at every moment.

Throughout the day our circadian rhythms respond primarily to light, which regulates our sense of physical and mental wellbeing.

Vibia's approach to coloured light invites the use of colour and intensity to create and experience different atmospheres, making them as natural and subtle as possible.

Colour is a source of emotion, it can instantly set a mood, convey a feeling or generate a sense of wellbeing.

Circus product options offer a range of static white in three different temperatures as well as the option of tunable white. Tunable lighting allows for comprehensive temperature regulation: colour temperature can be precisely tuned depending on the desired atmosphere for every scene.

The **tunable red** option allows you to glide from red to white, exploring a range of relaxing and cosy effects. Tunable white lighting option allows for comprehensive temperature regulation depending on the atmosphere of every scene.

Contact Vibia Support Service at [vibia.com](https://vibia.com) for any kind of assistance or recommendation when designing an atmosphere of wellbeing, or if you require support with control system approach.

# Circus Solo

Design by Antoni Arola.

The Circus system incorporates a range of independent elements that can be surface mounted to the ceiling, including spots, downlights and general lighting fixtures. This line allows professionals to create harmonic compositions and subtle atmospheres that break with the standards.

Create your own composition easy and quick at [vibia.com](http://vibia.com) selecting the option that best fits your needs.

Connecting space application

Custom configurations include ceiling-to-ceiling, wall-to-wall, floor-to-wall, wall-to-ceiling, or suspended from the ceiling into open space. Through their physical form and the light they cast, they create and disrupt architectural planes.

Connectable

The Sticks collection has three sizes: 1.5 m , 2 m, or 3 m, and they can be connected one to each other to a total maximum lenght of 6.5 meters per electrical connection.

Pendnats-Wall

Sticks are connected one to each other with a 15 cm length cord.

Each stick rotates on its own axis, allowing light to be directed precisely where needed.

Vertical Pendant

# Kontorno

Design by Sebastian Herkner.

Consisting of an elegant linear framework complemented by a cylindrical diffuser or curved reflector, the Kontorno collection envelops the light source it contains, offering diffuse, balanced illumination.

The Kontorno pendant consists of a streamlined silhouette that appears to float from invisible cables. Embedded with LEDs, curved volumes are balanced by sleek geometric architecture. The reflector lends an intentional look of raining light.

# Ghost

Design by Arik Levy.

A study in contrasts, the Ghost collection embodies both spirit and materiality, discretion and presence. A contemporary reimagining of the grand lights that once graced entryways and living areas, its sensuous form radiates with a warm, welcoming glow.

4987

Ø 47,5 cm

True to its namesake, the Ghost pendant possesses an ethereal presence. Large in scale yet elegant in sensibility, the luminaire floats overhead from nearly invisible cables to provide a striking focal point in any space. Crafted meticulously of mouth-blown opal triplex glass, Ghost's rich, smooth material generates a warm, ambient glow.

# Tube Free

Design by Ichiro Iwasaki.

Tube Free seemingly emancipates the tube from its point of connection to create a landscape of independent pendants. When set out over a space, the arrangement of numerous tubes of equal or varying heights creates a delicate structure and facilitates a harmonious congregation of shades.

Composed of two different sized luminaires and a black tube that extends vertically, it conducts light to wherever it is required, integrating within the architecture of any interior.

# Tube

Design by Ichiro Iwasaki.

Tube is a modular pendant and ceiling system with numerous possibilities. Composed of three different sized luminaires and a black tube that extends both vertically and horizontally, it conducts light to wherever it is required, integrating within the architecture of any interior.

Tube is an innovative system of hanging lamps: a network of tubes directs the light from a single point of connection to numerous luminaires that can be freely positioned within a space. The tubes draw distinct lines across a wall, ceiling or through space, offering a graphic tool with which to design a space, as well as the opportunity to configure multiple configurations.

# Guise

Design by Diez Office.

Crafted of precision-cut glass and embedded with a row of recessed LEDs, Guise explores the relationship between light and transparency. The light inside the glass appears invisible, while the delicately engraved surface generates a beautiful diffusion.

Crafted of borosilicate glass, a lightweight and industrial-grade material prized for its superior strength and durability, the Guise pendant can be fitted horizontally or vertically in any space. It is suspended from an invisible cable which lends a sense of weightlessness to the overall expression. Radiating with an intense glow, a special sensor offers dimming control without direct contact.

# Skan

Design by Lievore, Altherr, Molina.

Skan is a sleek and unadorned fixture. It combines lean lines with soothing purity of form, adding a minimalist sensibility to any space.

Sleek and understated, the Skan pendant adds a minimalist sensibility to any space. The LED-powered design is marked by a restrained geometric profile with its elegant interplay of lean lines and gentle curves. Suspended overhead by a lean cable, its saucer-like silhouette is at once delicate and dramatic.

INDIVIDUAL MODEL

Skan's sleek disc design is defined by its pure form and simple lines. The LED-powered pendant features a steel canopy and diffuser that casts a broad, bright dimmable light. Streamlined and understated, it lends a quiet elegance as a single lamp or grouping of pendants.

# Flamingo Mini

Design by Antoni Arola.

Flamingo Mini creates multi-layered silhouettes with an avant-garde, intriguing aesthetic. This hanging lamp recalls a bird hovering overhead, bringing an intimate ambience as it casts diffuse gradations of soothing light through its translucent diffuser.

The Flamingo Mini collection pairs poetic beauty with high quality performance. Its deconstructed design separates an LED light source from layers of translucent diffusers, producing soft gradations of illumination. The diffusers are available in a range of different configurations, each LED performing like a spotlight, directed upwards or downwards to produce an ambient effect.

# Cosmos

Design by Lievore, Altherr, Molina.

Design and light become one with the Cosmos collection. Flattened spheres suspended from slim cables create a cluster of pendant lights like a constellation of stars.

The minimalist, lacquered discs floating in space, their simple, sculptural curves and muted finishes, transmit a tranquil sensibility. LEDs are embedded within the opaque diffusers, unifying design and light source to generate a warm, indirect glow.

# Match

Design by Jordi Vilardell & Meritxell Vidal.

Based on the principle of co-creation, Match is a lighting collection that can be fully customised virtually. Characterised by unlimited configurations, Match's kinetic clusters exude a textured, sculptural presence.

Match is a unique pendant collection constructed from sleek aluminum rods finished in matt lacquered white or matt lacquered graphite and equipped with LED light terminals. Fully customisable, it is based on the concept of co-creation, taking on myriad forms to suit any space: from tight, concentrated clusters to sprawling configurations that span a larger area.

- 03 White (RAL 9016)

Vibia's general lighting, spot accent and downlight luminaires include the option of tunable white. Combining these zenithal tunable white lights with the rest of the diffused and indirect lighting effects of Vibia's portfolio, you can design the perfect scene for every moment and use.

**Tunable White (2200K – 4000K)**

Tunable white lighting option allows for comprehensive temperature regulation depending on the atmosphere of every scene.

**Static White 2700K; 3500K**

You can select the static white option that fits best with the desired ambience.

Contact Vibia Support Service at [vibia.com](https://www.vibia.com) for any kind of assistance or recommendation when designing an atmosphere of wellbeing, or if you require support with control system approach.

# Rhythm

## Horizontal

Design by Arik Levy.

Minimalist in form yet simultaneously complex, Rhythm features slender light modules of varying lengths, each fitted with an LED, that can be arranged in endless configurations. Fluid and flowing or angular and anarchic, the collection offers total freedom of composition.

Wood

The collection includes the option of a natural wood in White oak or Walnut. Reflected in its textured surface, warm light bathes the space, producing a rich and restorative atmosphere.

- 82 White oak
- 83 American walnut

# Mayfair

Design by Diego Fortunato.

A modern reimagining of the traditional 19th-century bouillotte lamp, the Mayfair collection is a statement in contemporary design. Perfectly proportioned, its luminaire casts a pool of diffuse, downward light to create an intimate lighting effect.

Featuring a steel or methacrylate diffuser, the LED-powered pendant lamp is distinguished by its timeless style and sleek silhouette. Available in a range of striking colours, it casts a warm ambient glow that's ideal for relaxed interior lighting.

# Algorithm Grid

Design by Toan Nguyen.

Like a cloud of frozen rain, this collection brings together beauty and geometry. Mathematical order provides a magical harmony with an astonishing range of permutations and compositions. Can be customized to suit any space.

Algorithm resembles a sparkling constellation of illuminated drops that appear to float in mid-air. Evoking a mood that's equal parts mathematical and magical, the pendant is anchored to the ceiling from a tubular steel lattice. Sleek tensile cables are studded with glowing, handblown glass orbs powered by LEDs and suspended at different heights. Fully customisable, each unique grouping of globes defines areas of interior space, underlining their multiple uses while becoming a single aesthetic element.

# Slim

Design by Jordi Vilardell.

Streamlined and refined, Slim serves as a sleek punctuation mark.

Distinguished by long, slender strands suspended from fibre cords, Slim draws the eye upwards like drops of light falling from the sky. Crafted of patterned glass diffusers, it lends a candlelit ambience that bathes a space in a soft pool of light thanks to its LED fittings.

# Tempo

Design by Lievore Altherr.

The Tempo collection reclaims our collective memory of light, distilling lighting archetypes to their most basic forms. Vibia presents three designs in two sizes: the disc, the diamond and the milk glass oval - all inspired by the interplay of opacity, translucence and transparency.

The Tempo pendant lamp collection integrates perfectly into all types of spaces and contemporary interior design projects. Suspended from the ceiling by a slim cable, its blown glass diffusers offer subtle nuances of transparency and translucency.

INDIVIDUAL MODEL

MULTIPLE MODELS

Set your composition at [vibia.com](http://vibia.com)

The classic bistrot globe has evolved with an oval organic shape with an graded lighting that crosses the spectrum from transparency to translucence. The opaline diamond shade illuminates with a diffused light of superior quality. The model with the reflector plate converts the bulb into a small brilliant bubble that radiates light.

Accent Downlight

Accent Spotlight

Wide Accent Downlight

Design by Martín Azúa.

Bind is a hybrid lighting system designed to create multiple atmospheres to suit a range of spaces, uses and moods. The connective quality, ease of installation and versatility of this fully modular system guarantees a harmonious balance between technical and decorative lighting, promising new holistic lighting solutions.

Bind easily integrates within the existing architecture; as a ceiling or suspended track, it allows designers to experiment with horizontal planes, ideal for spaces with high ceilings where it is necessary for light to be conducted to a lower height; and, as a hybrid combination, the collection lends itself to complex compositions of various atmospheres.

To highlight a particular activity zone or feature within the space, Bind track is also compatible with a series of spots and downlights that provide functional, accented lighting.

Multiple luminaires can be seamlessly connected to the track at any point, oriented to direct light in various directions. The different pieces are made in pincer format to be applied at any point of the track and move easily and immediately as desired.

The Bind collection features ceiling surface and ceiling suspended track lighting, where a conductive bar or “track” represents the central element from which multiple luminaires can be fixed at any point. Bind track is compatible with a series of spots, downlights, lineal and general lighting fixtures that provide all types of functional lighting.

Dynamic light

Dynamic light allows professionals to play with subtle degrees of intensity and colour temperature to recreate a subtle ambience for every scene within a lighting project

Designing an atmosphere of wellbeing is based on two main axes: **space** and **time**. The axis of time implies the concept of dynamic light .

Atmosphere design is intentional, depending on the **design of different scenes according to the specific use of a space** as it evolves throughout the day. Light is dynamic because ambience also depends **on the time of day** and on the influence of the natural light at every moment.

Throughout the day our circadian rhythms respond primarily to light, which regulates our sense of physical and mental wellbeing

Comfortable environments

Vibia’s spot accent, downlight and general lighting luminaires include the option of tunable white. Combining these zenithal tunable white lights with the rest of the diffused and indirect lighting effects of Vibia’s portfolio, you can design the perfect scene for every moment and use.

Tunable lighting allows for comprehensive temperature regulation and intensity: colour temperature can be precisely tuned depending on the desired atmosphere for every scene.

Static White

Tunable White

Contact Vibia Support Service at [vibia.com](https://vibia.com) for any kind of assistance or recommendation when designing an atmosphere of wellbeing, or if you require support with control system approach..

Bind track is compatible with the Skan, Slim, North, Tempo and Tube pendant collections, presenting a range of decorative silhouettes with multiple lighting effects. Single or multiple pendants can be suspended as desired, allowing for the formation of intricate chandeliers created from a compilation of tracks with multiple pendants.

# North

Design by Arik Levy.

North pendant collection consists of triangular Aluminum shades pendant from cables and adjustable carbon fibre rods. The rod and shade are disconnected from one another via nearly invisible cables in a dynamic system of adjustable parts, directing the LED-powered light where needed.

# Plusminus<sup>+ -</sup>

Design by Diez Office

Plusminus is a versatile lighting system that takes the concept of the light rail to a new level. The conductive textile ribbon at its core allows for free placement of the luminaires and the creation of unique light solutions on the spot.

The fluidity  
of light

Equal parts easy and avant-garde, Plusminus harnesses the design of a belt in a groundbreaking lighting concept that merges materiality and light. Featuring a textural, fabric belt that conducts electricity, it enables light to flow through space. Plusminus provides professionals a powerful toolkit for creating personalised lighting effects and unique atmospheres with different luminaires via Vibia's digital platform and click-and-connect functionality.

Luminaire types  
and lighting effects

Sphere

**Volumetric Diffuser**  
distributes light equally in all directions (360°). It attracts a relaxed gaze towards the point of light, and creates a calm, very comfortable atmosphere. The light sphere bathes all surfaces of the space, producing a peaceful, richer and extremely homogenous ambience.

Semisphere

**Hidden Diffuser**  
emits a soft light that generates low contrasts between the illuminated areas and the shadows cast. The opaque part of the shade helps to direct the light through the diffuser, providing illumination that is both peaceful and concentrated at the same time.

Cone

**Hidden Diffuser**  
emits a soft light that generates low contrasts between the illuminated areas and the shadows cast. The opaque part of the shade helps to direct the light through the diffuser, providing illumination that is both peaceful and concentrated at the same time.

Spotlight

**Flat Diffuser**  
emits a soft light that generates low contrasts between the illuminated areas and the shadows cast. It is ideal for reading situations or when the light output is visible, as it does not produce glare.

**Accent**  
emphasizes objects or architectural elements with intensive cones of light. Luminance contrasts attract the eye and bring the illuminated objects into the foreground. The light output is directed towards the object or architectural element and not towards the person, in order to avoid glare.

Linear Diffuser

**Linear Flat Diffuser**  
provides a high degree of uniformity on the horizontal plane and generates a first layer of illumination on which to add more specific lighting applications. It generates soft shadows and subdued brightness in which the space and its component elements do not display visual hierarchies.

Linear Low UGR

**Linear High Efficiency Low Glare**  
offers medium brightness and clarity of forms. Direct illumination, extended beam and luminaire performance enable installations with high-energy efficiencies and low-glare levels below UGR<19.

**Linear High Comfort Low Glare**  
provides high levels of illumination and comfort with UGR levels below 19. It is also ideal for work or meeting areas.

Easy connection  
Fix / Click / Connect

Each belt, which can be cut as needed, accommodates multiple luminaires and operates with simple plug-in technology for unparalleled ease of installation and connection. The belt offers adjustments in tension from taut to relaxed as well as click-and-connect functionality, snapping into a buckle attached to each luminaire.

## Visual Hierarchy

Plusminus's revolutionary belt design provides a powerful toolkit for reimagining spaces. Combining multiple lighting effects and placing light precisely where needed, it creates visual hierarchies in any space.

The fabric belt offers endless flexibility of use, conducting light across a range of ceiling shapes and angles.

Place multiple lights in different positions throughout a space with just a single electrical connection.

An invitation to position light without limits, Plusminus accommodates any kind of architecture—no matter how unique.

## Raining Light

From a single spotlight positioned close at hand to a cascading installation of luminaires overhead, Plusminus's ceiling-to-floor possibilities create a stunning display of light in varying intensity and effect.

Plusminus's powerful design capabilities include constructing columns of light up to 60 meters high.

### Climbing the Walls

An innovative take on the wall lamp, Plusminus's fabric belt forms a linear architecture that hosts an array of lighting options—from a long row of accent lamps illuminating a hallway to sleek luminaires straddling opposite walls.

## Flowing Pendants

Defined by their flowing, continuous forms, Plusminus pendants provide endless possibilities for illuminating a space. Suspended overhead in silhouettes, soft and draped or taut and precise, their graphic presence creates distinctive ambiances.

“The Plusminus collection is a toolbox which, thanks to the wide range it contains, enables you to find solutions to an incredible number of lighting problems. I think architects and lighting designers today need investment certainty, and Plusminus offers that.”

Stefan Diez

Composing Light

Both object of beauty and high-performance lighting toolkit, Plusminus offers personalised atmospheres while doubling as striking visual sculpture.

## Creative Canopy Connection

Plusminus reimagines the use of the canopy. The belt flows in and out of the canopy, establishing conductivity and electrical connection where needed, with creative configurations becoming an essential element of the design.

A surface canopy presents yet another opportunity to play with Plusminus, securing the belt in one spot while allowing it to flow freely across a space in countless configurations.

## Defying Gravity

Plusminus's nearly invisible tensor wire introduces an element of intrigue to lighting. The wire extends from the belt to the wall or the ceiling, quietly completing the luminaire's design while lending it the magical look of floating in midair in defiance of gravity.

### Balancing Act

Wall-to-wall installations hang in a delicate balance with Plusminus's invisible ceiling tensor. Lifting or lowering the belt, the cable creates varying degrees of tension that enables infinite configurations.

## Suspended Animation

Ceiling design no longer limits lighting options thanks to Plusminus. A bar suspended from the ceiling serves as both a sleek architectural feature and an opportunity for creative exploration.

Play with height and length  
to suit any setting and affix personalised  
belt designs for a one-of-a-kind look.

Bar length 2 m  
Tensor cables max. 5 m

## Reimagining Spaces

Merging light and materiality, Plusminus introduces masterful new ways to delineate space. Tracing a slender outline, the fabric belt creates a contained area within an open layout, serving as an illuminated perimeter with minimal presence.

## Framing Space

Plusminus's lean lines define an interior with precise transverse trajectories. Stretching from wall to wall, the belt evokes the effect of a false ceiling, reducing a room's volume and bringing light closer. With kinetic crisscrossed and zigzagged configurations or soothing straight lines, the luminaires appear integrated into the architecture.

Plusminus's nearly invisible tensor wire introduces an element of intrigue to lighting. Lifting or lowering the belt, the cable creates varying degrees of tension that enables infinite configurations.

Plusminus' inherent adaptability provides the perfect solution for spaces that feature special architecture, scale, materials, or artwork.

# Africa

Design by Francisco Gomez Paz.

An object of desire, Africa is a unique gift that combines richness of form and materiality with high performance lighting capabilities. A holistic exploration of beauty and functionality.

“Africa was born as a response to new nomadic, free and casual ways of inhabiting, in which residential and professional spaces are increasingly hybridised”.

Francisco Gomez Paz

Portable

Its chargeable LED light source provides three levels of intensity which are controlled by a simple push button at the head.

Bolt-down

The bolted version is fixed in position, designed to integrate within the surrounding architecture.

# Dama

Design by Ludovica+Roberto Palomba.

A homage to the Abat-Jour lamp, the Dama collection connects the charm of tradition with the finesse of contemporary lighting design. Combining technical precision with aesthetic simplicity, Dama is ideal for shaping an intimate atmosphere with an elevated look.

Distinguished by its exposed frame, a cylindrical shade rests neatly on top of a slender aluminium stem which branches out into three legs available in two stylish finishes. The delicacy of the frame provides a feeling of weightlessness, enhanced by the softness of the paper diffuser.

“Paper, with its ‘imperfect perfection’,  
gave us precisely the sense of warmth  
that we were looking for, and at the  
same time a sense of lightness”.

Ludovica+Roberto Palomba

With a desire for integrity, Dama incorporates a circular LED with an internal diffuser, projecting a warm 360 degree glow from an invisible source.

Floor switch

Table switch

# Lily

Design by Ludovica+Roberto Palomba.

The Lily collection reveals contemporary lines with an ineffable lightness. Its graceful glass diffuser radiates with warmth and wellbeing, ideal for an elegant interior with a relaxed ambience.

Pairing timeless design with an ambient 360 degree glow, Lily is as intimate in performance as it is elegant in form.

A contemporary reimagining of the classic lampshade, it is characterised by a smooth, translucent glass diffuser which gently curves over at the top to conceal an invisible LED light source. A elegant aluminium stem denotes appeal as well as stability. The base consists of three or four rods which meet in the centre before branching out at the top to support the diffuser. The slender nature of the stem accentuates the sensuous curve of the diffuser.

# Knit

Design by Meike Harde.

Light, materiality and tangibility collide with the Knit collection. Its texture is magnetic, calling out for us to touch its surface, to feel its warmth and to keep it close. Light seeps outwards through the fabric transmitting a soft 360° glow.

KNIT

A single knitted lycra sleeve stretched over an ovoid polymer diffuser, its texture is magnetic, calling out for us to touch its surface, to feel its warmth and to keep it close.

# Mayfair Mini

Design by Diego Fortunato.

The perfect lighting companion, the Mayfair Mini is a small-scale design that casts a contained pool of diffuse, downlight for an intimate atmosphere. A light to grab and go that can be moved where needed -indoors or out- via its slender stem.

The Mayfair Mini is offered in three formats. The portable version is perfect for indoor and outdoor use. Powered by a rechargeable battery, it can be transported to any desired position. It also comes in two bolted versions, available either with a base. The bolted formats are fixed in position, designed to integrate within the surrounding architecture.

# Mayfair

Design by Diego Fortunato.

A modern reimagining of the traditional 19th-century bouillotte lamp, the Mayfair collection is a statement in contemporary design. Perfectly proportioned, its luminaire casts a pool of diffuse, downward light to create an intimate lighting effect.

Featuring a steel column and steel or methacrylate shade, the LED-powered floor lamp casts an ambient glow that's ideal for a relaxed interior setting and can be dimmed via an optical sensor.

# Balance

Design by Jordi Vilardell.

Balance features a classic drum shade, elegantly cantilevered from its column to provide a general ambient lighting effect or a more focused reading light.

5189 5190  
260 x 210 cm

5191 5192  
215 x 210 cm

The Balance floor lamp serves multiple requirements simultaneously. Illuminating a variety of spaces with its simple movement - it functions as a dining room lamp, an ambient living room light, or a reading lamp for work purposes. Evoking the essence of its namesake, the drum shade is poised on a metal rod cantilevered from its steel column. Adjusting a small pull piece on the diffuser activates the fixture's counterweight system, enabling it to move to the right or left, or up or down - all the while remaining parallel to the floor.

# Flat

Design by Ichiro Iwasaki.

A study in geometry, the Flat collection features distinctive, disc-shaped diffusers that form horizontal planes of light, infusing a space with pools of soft illumination.

The LED-powered collection features flat metal plates reflecting light off their surface, casting an enveloping, wraparound glow that appears illuminated from within. The floor lamp comes in small and large sizes, with a single or double plate - either a compact disc or a shelf-like plate that doubles as furniture. When deployed in pairs, the smaller, complementary disc captures and reflects light back at the larger plate, creating pockets of soft, pooled indirect light that illuminate both the space and the surface itself.

# North

Design by Arik Levy.

North features a base, stem, and shade that are disconnected from one another in a dynamic system of adjustable parts. Protruding arms hold triangular shades that direct the light where needed.

The North Floor Pendant is defined by a dynamic, deconstructed silhouette. It synthesises the typical floor and pendant lamp by connecting floor and ceiling, its sleek conical shade hanging from a slender carbon fibre rod and secured by a counterweight at floor level. The angle of the rod is adjustable, allowing light to be directed precisely over a coffee table or sofa.

# Pin

Design by Ichiro Iwasaki.

A timeless proposal from Japanese designer Ichiro Iwasaki, the Pin is both classic and contemporary. Characterised by a graceful stem and subtle, functional expression, it is small in scale but with exceptional lighting efficiency.

Slick, refined and understated, the Pin floor lamp is a state of the art design. Perfect for reading, its simple geometric form is designed to arc playfully over a sofa or chair.

Offering two arm lengths, a single or double stem and with an adjustable head, the Pin table lamp provides versatile task lighting that's ideal for work spaces.

# I.Cono

Design by Lievore, Altherr, Molina.

Distinguished by its signature visor-shaped shade, I.Cono presents a poised presence. The visual purity of its angular shade is matched by a sleek base and stem and complemented by a range of elegant finishes.

I.Cono's smooth surfaces and refined silhouette conceal advanced mechanisms for rotating the head and metal base, ideal for precision lighting and reading.

# Skan

Design by Lievore, Altherr, Molina.

Skan is a sleek and unadorned fixture.  
It combines lean lines with soothing purity of  
form, adding a minimalist sensibility to any space.

Characterized by simple shapes that exude an unmistakable elegance, the Skan floor lamp features flat, disc-like shades which emit a diffuse, comfortable uplight. Three slender stems are entwined like a group of trees, the body and head available in various contemporary matte finishes.

# Ghost

Design by Arik Levy.

A study in contrasts, the Ghost collection embodies both spirit and materiality, discretion and presence. A contemporary reimagining of the grand lights that once graced entryways and living areas, its sensuous form radiates with a warm, welcoming glow.

The Ghost table lamp features a stacked silhouette of voluminous forms to offer an enveloping luminous effect. A black band encircles the midsection, accentuating its sensuous curves while serving as a hand-touch dimmer.

“Ghost is the pure expression of a state of mind, of the immateriality of mouthblown glass that projects a sensuous halo in space”.

# Warm

Design by Ramos & Bassols.

A contemporary take on a timeless design, Warm features a generous drum shade in a muted colour palette for a refined touch.

Bringing a touch of elegance that's adaptable to any atmosphere, Warm is available in two models: the translucent screen provides general ambient illumination and the opaque aluminium shade offers a brighter, up- and downlight.

# Offset

Design by Xuclà.

Offset consists of a vertical rod extending from a solid base. The rod can be angled to illuminate an adjacent wall with a diffuse, ambient lighting effect. A combination of multiple fixtures of different lengths adds a graphic dimension to a contemporary interior.

Never harsh or obvious, these are thoughtful, ultra-nuanced colours that respect and reflect the characteristics of natural light while capturing or enhancing a desired mood or moment. Applicable to day and night and every hour in between, each hue has an adaptable tone that can be tailored to any scenario or space.

Whatever the situation, these are illuminating tones that set the stage for life in all its colourful complexity.

A source of emotion

Colour is a source of emotion it can instantly set a mood, convey a feeling or generate a sense of wellbeing

Vibia’s approach to coloured light invites the use of colour and gradients to create and experience different atmospheres, making them as natural and subtle as possible. Natural light is never mono-tonal. Gradients come in infinite colours.

Vibia Chromatica colours of light

Static White

You can select any desired light -white, colour mood or gradient- and intensity manually from the analogic product interface. You can also integrate your selection into the control system for specific scene design and activate it using the Vibia App

Colour Moods

Contact Vibia Support Service at [vibia.com](https://www.vibia.com) for any kind of assistance or recommendation when designing an atmosphere of wellbeing, or if you require support with control system approach.

Delicate colour mood

A warm and glowing orange-yellow hue, reminiscent of afternoon sun spilling through the window. Golden tones from apricot pink to soft orange meet in the gradient.

# Plusminus Solo

Spot Flat Diffuser

Spot Accent Light

Design by Diez Office.

Introducing a collection of versatile semispheres, Plusminus Solo offers complete freedom to create dynamic and restorative atmospheres. A combination of various typologies unlocks harmonious effects, from diffuse and general through to accented lighting.

Table switch

Floor switch

Plusminus Solo offers two distinct designs, visually connected by their signature semi-spherical shades. A range of dome-shaped flat diffusers can be positioned as desired, directed upwards from floor level or tilted at an angle. A compact floor or table lamp completes the set. With a thick cylindrical base and adjustable shade, this portable model provides accent or diffuse spotlighting wherever needed.

# Duo

Design by Ramos & Bassols.

Duo brings natural warmth to a space. Its gently curved form encases a supple wood-finished interior, lending a soothing sensibility.

Articulated through simple volumes with a sculptural quality, Duo becomes a focal point without the need for suspension. Crafted in veined oak and matte-lacquered aluminum, its sleek shell and richly textured veneer yield an intriguing material contrast, complemented by a rich, diffuse downlight.

Vibia’s general lighting, spot accent and downlight luminaires include the option of tunable white. Combining these zenithal tunable white lights with the rest of the diffused and indirect lighting effects of Vibia’s portfolio, you can design the perfect scene for every moment and use.

**Tunable White (2200K – 4000K)**  
Tunable white lighting option allows for comprehensive temperature regulation depending on the atmosphere of every scene.

**Static White 2700K; 3500K**  
You can select the static white option that fits best with the desired ambience.

Contact Vibia Support Service at [vibia.com](https://www.vibia.com) for any kind of assistance or recommendation when designing an atmosphere of wellbeing, or if you require support with control system approach.

“We chose wood because it’s a natural and quality material. It lends warmth and at the same time contrasts with the surrounding meta”

# Duo Petra

Design by Ramos & Bassols.

Duo Petra's slate veneer lends a timeless elegance to the collection. The ceiling lamp's gently curved form encases a velvety slate-finished interior for a sophisticated, natural aesthetic.

Simple volumes meet sculptural quality in Duo Petra, expressly designed for those lower-ceiling rooms where a pendant fitting is not suitable. It stands harmonious and sleek, its satinised diffuser radiating with a soft and general diffuse light.

Vibia’s general lighting, spot accent and downlight luminaires include the option of tunable white. Combining these zenithal tunable white lights with the rest of the diffused and indirect lighting effects of Vibia’s portfolio, you can design the perfect scene for every moment and use.

**Tunable White (2200K – 4000K)**  
Tunable white lighting option allows for comprehensive temperature regulation depending on the atmosphere of every scene.

**Static White 2700K; 3500K**

Contact Vibia Support Service at [vibia.com](https://www.vibia.com) for any kind of assistance or recommendation when designing an atmosphere of wellbeing, or if you require support with control system approach.

Duo Petra's silky slate-lined interior provides a subtle contrast with its matte aluminum outer shell, a sober and modern aesthetic for an elegant interior style.

# Circle

Combining accent, diffuse and general lighting effects with dynamic control and temperature regulation, Circle is a highly-functional complementary product designed to curate a nuanced ambience.

## Dynamic light

Designing an atmosphere of wellbeing is based on two main axes: **space** and **time**. The axis of time implies the concept of dynamic light .

Atmosphere design is intentional, depending on the **design of different scenes according to the specific use of a space** as it evolves throughout the day. Light is dynamic because ambience also depends **on the time of day** and on the influence of the natural light at every moment.

Dynamic light allows professionals to play with subtle degrees of intensity and colour temperature to recreate a subtle ambience for every scene within a lighting project

Throughout the day our circadian rhythms respond primarily to light, which regulates our sense of physical and mental wellbeing

## Comfortable environments

Vibia’s spot accent, downlight and general lighting luminaires include the option of tunable white. Combining these zenithal tunable white lights with the rest of the diffused and indirect lighting effects of Vibia’s portfolio, you can design the perfect scene for every moment and use.

Tunable lighting allows for comprehensive temperature regulation and intensity: colour temperature can be precisely tuned depending on the desired atmosphere for every scene.

Contact Vibia Support Service at [vibia.com](https://www.vibia.com) for any kind of assistance or recommendation when designing an atmosphere of wellbeing, or if you require support with control system approach.

Scenographic lighting plays a critical role in retail design. Light enhances the expressive capacity of a space, creating visual hierarchy and ensuring a dialogue with customers. Different effects can be used to highlight certain products, draw the eye to particular areas and determine the general atmosphere, strengthening the shopping experience. Diffusers and wall-washers ensure comfortable background lighting, while accent downlights and spots create brilliance and contrast, lifting products out of their setting for dramatic effect.

Accent Downlight - Colour

**COLOUR MODELS**  
A set of minimalist accent downlights in four versatile finishes attracts a relaxed gaze to a specific point of light. The option of a trimless profile offers seamless integration within the surrounding architecture.

Circle is designed to complement Vibia's wider product range. Its four contemporary tones and trim or trimless profile adapt to both high contrast and subtle design requirements. Especially suited to a natural, rounded aesthetic, the walnut and oak finishes combine well with Dots and Duo.

# Wall Washer

A Wall Washer option can be used to illuminate a vertical surface with uniform brightness, to accentuate an entrance or to highlight a specific feature such as a shelving unit. Light reflected from the matte surface of the wall makes the space appear brighter and provides soft, diffuse illumination.

- 11 Black (NCS S 8500-N)

# Top

Design by Ramos & Bassols.

Soft, spherical shapes and a warm luminescence characterize the Top collection. Its glowing epicenter is encircled by a larger ring, framing the light within its pure geometry.

A contemporary take on the traditional rosette motif, Top is defined by a pair of concentric circles that combine to produce a halo of ambient, indirect light.

1170

Ø 90 cm

Top distills the timeless rosette down to its essence. A pair of simple circles creates a pulsing nucleus of LED-powered light overhead. The smaller illuminated sphere projects light outwards towards the larger one, creating a halo of even, indirect light and generating a soothing atmosphere.

# Circus

Design by Antoni Arola.

A creative toolkit full of possibilities to explore and enjoy, Circus offers total freedom of composition, multiple components and a myriad of diffuse, accented and reflected lighting effects. Inspired by the tension and dynamics of a trapeze act, the collection is defined by its minimalist structure and signature conductive bar, delicately balanced by opposing elements to create a joyful festival of light.

Often considered the heart of any home, the kitchen serves as a space for preparing food, for cooking, and for eating.

But it also transcends its functional purpose.

The act of eating creates an opportunity for people to gather together. It is a social space, a meeting point for the entire family, and a manifestation of cultural traditions.

A good kitchen should combine functionality with aesthetics, embracing the many different uses we have for our kitchens today. Circus allows the designer to play with different lighting effects, introducing a variety of fixtures that can be built into the conductive bar, suspended from a track or hung directly from the surface of the ceiling. Go to [vibia.com](http://vibia.com) to find the best solution for your project.

Spots and downlights can be used to play with contrasts, define functional areas or highlight key aspects of a space. Thanks to their capacity for adaptation, rotation, and different degrees of lens aperture, Circus spotlights accommodate different functions. The narrower the beam, the more specular the light becomes, creating dynamic visual hierarchies with darker shadows and intense highlights.

The bar amplifies the possibilities for shaping a space by conducting electricity and transporting light to wherever it is needed, turning the professional into a composer of atmospheres.

The track is available in two sizes and the electrical connection piece is concealed to adapt to all kinds of ceilings. A choice of two versatile finishes ensures the collection adapts to any interior style.

Ceiling Tracks

Developed both vertically and horizontally, the system combines spots, reflective discs and a range of striking diffusers to create a perfect synthesis of atmospheres. With a traditional light rail the connection is visible from below, but with Circus, the luminaires are connected to the bar from above and sealed with cover, significantly enhancing the aesthetic purity of the design.

Dynamic light

Dynamic light allows professionals to play with subtle degrees of intensity and colour temperature to recreate a subtle ambience for every scene within a lighting project

A source of emotion

Designing an atmosphere of wellbeing is based on two main axes: **space** and **time**. The axis of time implies the concept of dynamic light .

Atmosphere design is intentional, depending on the **design of different scenes according to the specific use of a space** as it evolves throughout the day. Light is dynamic because ambience also depends **on the time of day** and on the influence of the natural light at every moment.

Throughout the day our circadian rhythms respond primarily to light, which regulates our sense of physical and mental wellbeing.

Vibia's approach to coloured light invites the use of colour and intensity to create and experience different atmospheres, making them as natural and subtle as possible.

Colour is a source of emotion, it can instantly set a mood, convey a feeling or generate a sense of wellbeing.

Static, tunable white and tunable red

Circus product options offer a range of static white in three different temperatures as well as the option of tunable white. Tunable lighting allows for comprehensive temperature regulation: colour temperature can be precisely tuned depending on the desired atmosphere for every scene.

The **tunable red** option allows you to glide from red to white, exploring a range of relaxing and cosy effects. Tunable white lighting option allows for comprehensive temperature regulation depending on the atmosphere of every scene.

# Circus Solo

Accent Spotlight

Circus Solo features a remote or built in accent spot that can be used to play with contrasts, define functional areas or highlight key aspects of a space. By mixing accent, reflected and diffuse lighting, the Circus system allows professionals to experiment with light density, creating multiple scenes within a single space.

# Flat

Design by Ichiro Iwasaki.

A study in geometry, the Flat collection features distinctive, disc-shaped diffusers that form horizontal planes of light, infusing a space with pools of soft illumination.

"A reflector lamp collection that connects a floating light source with a linear structure. Minimal reflector discs and linear structure provide simple and powerful universality like alphabets and musical scores".

# Line

High Comfort Diffuser

Flat Diffuser

High Efficiency Low Glare

Wall Washer

Colour Mood Grazer

Line consists of a series of simple linear luminaires, each with a distinct lighting effect. Integrating dynamic control and subtle gradients in intensity, tone and colour, the collection complements Vibia's wider product range to curate a subtle atmosphere.

Dynamic light

Designing an atmosphere of wellbeing is based on two main axes: **space** and **time**. The axis of time implies the concept of dynamic light .

Atmosphere design is intentional, depending on the **design of different scenes according to the specific use of a space** as it evolves throughout the day. Light is dynamic because ambience also depends **on the time of day** and on the influence of the natural light at every moment.

Dynamic light allows professionals to play with subtle degrees of intensity and colour temperature to recreate a subtle ambience for every scene within a lighting project

Throughout the day our circadian rhythms respond primarily to light, which regulates our sense of physical and mental wellbeing

Comfortable environments

Vibia’s spot accent, downlight and general lighting luminaires include the option of tunable white. Combining these zenithal tunable white lights with the rest of the diffused and indirect lighting effects of Vibia’s portfolio, you can design the perfect scene for every moment and use.

Tunable lighting allows for comprehensive temperature regulation and intensity: colour temperature can be precisely tuned depending on the desired atmosphere for every scene.

Contact Vibia Support Service at [vibia.com](https://www.vibia.com) for any kind of assistance or recommendation when designing an atmosphere of wellbeing, or if you require support with control system approach.

# High Comfort Diffuser

Available in various lengths, with and without trim, and in two modest finishes, Line guarantees subtle integration within the surrounding architecture. The homogeneous quality of light from the High Comfort diffuser is designed to create a peaceful, rich and relaxing ambience, ensuring smooth lighting across the surface of the ceiling.

Updated detailed spec sheets on [vibia.com](https://vibia.com)

A well-illuminated work space with clearly defined areas of activity can enhance productivity, concentration and dialogue, strengthening the work-day experience and generating a collective sense of well-being. General lighting sets the tone, washing a space with comfortable uniform illumination that brightens the entire area. Task lighting, on the other hand, provides the right kind of light for a specific use. The nature and intensity of the light is determined by the intended purpose, defining clear “activity zones” within a space.

Flat Diffuser

Featuring a translucent cover to control the brightness, the Flat Diffuser creates a comfortable atmosphere by casting a pleasant, uniform light. Designers can experiment with composition, incorporating various lengths for a distinctly linear look.

## A source of emotion

Colour is a source of emotion it can instantly set a mood, convey a feeling or generate a sense of wellbeing

Vibia’s approach to coloured light invites the use of colour and gradients to create and experience different atmospheres, making them as natural and subtle as possible. Natural light is never mono-tonal. Gradients come in infinite colours.

## Vibia Chromatica colours of light

### Static White

You can integrate your lighting selection into the control system for specific scene design and activate it also using the Vibia App.

### Colour Moods

Contact Vibia Support Service at [vibia.com](https://www.vibia.com) for any kind of assistance or recommendation when designing an atmosphere of wellbeing, or if you require support with control system approach.

## Still colour mood

Light and airy, with a softness that suggests the quiet moment before a new beginning. A pale and thin green light, inspired by the very first rays of morning light. The gradient has a hint of blue to it.

# Offset

|                                                                                     |                           |

|    | Flat Diffuser             |
|  | High Efficiency Low Glare |
|  | Colour Mood Grazer        |

Design by Xuclà.

Offset combines intuitive lighting with an industrial, geometric silhouette. A complementary system of superficial ceiling fixtures, the collection integrates five lighting effects with advanced colour and temperature regulation for a carefully curated atmosphere.

Dynamic light

Designing an atmosphere of wellbeing is based on two main axes: **space** and **time**. The axis of time implies the concept of dynamic light .

Atmosphere design is intentional, depending on the **design of different scenes according to the specific use of a space** as it evolves throughout the day. Light is dynamic because ambience also depends **on the time of day** and on the influence of the natural light at every moment.

Dynamic light allows professionals to play with subtle degrees of intensity and colour temperature to recreate a subtle ambience for every scene within a lighting project

Throughout the day our circadian rhythms respond primarily to light, which regulates our sense of physical and mental wellbeing

Comfortable environments

Vibia’s spot accent, downlight and general lighting luminaires include the option of tunable white. Combining these zenithal tunable white lights with the rest of the diffused and indirect lighting effects of Vibia’s portfolio, you can design the perfect scene for every moment and use.

Tunable lighting allows for comprehensive temperature regulation and intensity: colour temperature can be precisely tuned depending on the desired atmosphere for every scene.

Contact Vibia Support Service at [vibia.com](https://www.vibia.com) for any kind of assistance or recommendation when designing an atmosphere of wellbeing, or if you require support with control system approach.

Accent Downlight

A complementary system of graphic fixtures, Offset accomodates ceilings that don't allow for recessed fittings. Ideal for transitional spaces, the accent downlight is visually compact. Pinpoints of light set into its robust aluminium casing attract a relaxed gaze towards the illuminated surface. Designers can experiment with composition, incorporating various lengths and angles to create a distinctly modular design.

Casting a pleasant, uniform, 360° light, the Flat Diffuser ensures a calm and luminous environment

# High Efficiency Low Glare

Eliminating unwanted glare, the Low-Glare High-Efficiency model provides comfortable general lighting suitable for transitional spaces and working environments such as libraries or offices.

Colour Mood Grazer

Natural light is never mono-tonal. The Colour Mood Grazer is an elegant solution where either Tunable White or Infinite Colour regulation is desired. Infinite Colour incorporates six static colours and six gradients, each spectrum unique to Vibia and designed to transmit a particular kind of sensation or mood. The installer plays a fundamental role in programming the appropriate lighting mode for the space and its desired use.

**Dynamic light**  
Like the natural light that ascends gradually at dawn or dusk, following circadian rhythms, our infinite colour gradients add layers of visual depth and emotion, adapting to specific scenes and moods by creating a nuanced atmosphere.

# A source of emotion

Colour is a source of emotion it can instantly set a mood, convey a feeling or generate a sense of wellbeing

Vibia’s approach to coloured light invites the use of colour and gradients to create and experience different atmospheres, making them as natural and subtle as possible. Natural light is never mono-tonal. Gradients come in infinite colours.

# Vibia Chromatica colours of light

## Static White

You can select any desired light -white, colour mood or gradient- and intensity manually from the analogic product interface. You can also integrate your selection into the control system for specific scene design and activate it using the Vibia App

## Colour Moods

Contact Vibia Support Service at [vibia.com](https://vibia.com) for any kind of assistance or recommendation when designing an atmosphere of wellbeing, or if you require support with control system approach.

# Palma

Design by Antoni Arola.

Antoni Arola brings an entirely new dimension to the Palma collection with a new ceiling edition. A central aluminium shaft extends vertically into the room, decorated with a choice of either two or four distinctive Palma spheres. Positioned at different heights and angles, they form an organic structure, projecting a warm, diffuse light in all directions.

# Plusminus Solo

Design by Diez Office.

The ceiling range can be mounted as desired, creating visual hierarchy by directing the gaze towards specific features within a space, and combined to form intriguing compositions.

Accent Spotlight

Spot Flat Diffuser

Plusminus Solo expands to include a range of surface mounted semi-spherical ceiling lights. Combining Accent Spotlights with Directed Flat Diffusers, the collection provides comfortable general lighting as well as more pointed illumination. Available in five elegant finishes, the set is designed to adapt to a range of contemporary interior styles.

Accent Downlight

Accent Spotlight

Wide Accent Downlight

Design by Martín Azúa.

Bind is a hybrid lighting system designed to create multiple atmospheres to suit a range of spaces, uses and moods. It allows professionals to experiment with different lighting typologies and levels of density, modelling a space by generating subtle gradients between soft and more accentuated light.

## Ceiling Tracks

The Bind collection features ceiling surface track lighting as well as a range of independent elements that can be fitted directly to the ceiling. The connective quality, ease of installation and versatility of this fully modular system facilitates holistic solutions to complex demands.

## Dynamic light

Dynamic light allows professionals to play with subtle degrees of intensity and colour temperature to recreate a subtle ambience for every scene within a lighting project

Designing an atmosphere of wellbeing is based on two main axes: **space** and **time**. The axis of time implies the concept of dynamic light .

Atmosphere design is intentional, depending on the **design of different scenes according to the specific use of a space** as it evolves throughout the day. Light is dynamic because ambience also depends **on the time of day** and on the influence of the natural light at every moment.

Throughout the day our circadian rhythms respond primarily to light, which regulates our sense of physical and mental wellbeing

## Comfortable environments

Vibia’s spot accent, downlight and general lighting luminaires include the option of tunable white. Combining these zenithal tunable white lights with the rest of the diffused and indirect lighting effects of Vibia’s portfolio, you can design the perfect scene for every moment and use.

Tunable lighting allows for comprehensive temperature regulation and intensity: colour temperature can be precisely tuned depending on the desired atmosphere for every scene.

The Bind Solo collection incorporates a range of independent elements that can be fitted directly to the ceiling, including spots, downlights and general lighting fixtures. This combination of functional lighting with decorative pendants means designers can create made-to-measure lighting solutions for moods and uses within the same space.

## Wide Accent Downlight

For softer contrasts and a more diffuse lighting effect, Bind Solo's Wide Accent Downlight floods the space from above, thanks to a generous diameter and wider gradient of light.

# Guise

Design by Diez Office.

Crafted of precision-cut glass and embedded with a row of recessed LEDs, Guise explores the relationship between light and transparency. The light inside the glass appears invisible, while the delicately engraved surface generates a beautiful diffusion.

The Guise ceiling light is surface-mounted and available in two sizes. Crafted of precision-cut borosilicate glass, light emanates from the tube while the source remains hidden. When turned on it becomes a luminous hypnotic presence; turned off, the transparent quality of the glass lends an airy sensibility.

# Structural

Design by Arik Levy.

Structural features cubic forms paired with slender metal rods that both join and separate its volumes. Deconstructing the source, it casts light in unexpected places, creating points of light connected in space.

Through the combination of direct and indirect lighting, Structural bathes ceilings with an intense lighting effect. Different cubic volumes meet and expand, its adaptable nature providing flexible solutions while its geometric form maintains a sense of order.

Vibia's general lighting, spot accent and downlight luminaires include the option of tunable white. Combining these zenithal tunable white lights with the rest of the diffused and indirect lighting effects of Vibia's portfolio, you can design the perfect scene for every moment and use.

**Tunable White (2200K – 4000K)**  
Tunable white lighting option allows for comprehensive temperature regulation depending on the atmosphere of every scene.

**Static White 2700K; 3000K; 3500K**  
You can select the static white option that fits best with the desired ambience.

Contact Vibia Support Service at [vibia.com](https://www.vibia.com) for any kind of assistance or recommendation when designing an atmosphere of wellbeing, or if you require support with control system approach.

# Spa

Design by Ramos & Bassols.

Spa is the perfect lighting solution for any wellness space. From public dressing rooms, restaurants and spas, to private kitchens, corridors and bathrooms, its graceful simplicity and linear form allow for seamless integration within a variety of humid interiors.

Multiple luminaires can be positioned in a row to illuminate up to six metres of wall or ceiling space from a single point of connection.

WALL & CEILING

Up

Design by Ramos & Bassols.

Inspired by the neoclassical cornice, Up's geometric form protudes from the ceiling with a quiet elegance. Its broad flat diffuser and refined rim create the illusion of daylight passing through an opening in the ceiling.

With a depth of merely 7 centimeters, the surface-mounted aluminum fixture adds an understated, yet distinctive design element.

# Puck

Design by Jordi Vilardell.

Inspired by the iconic circle motif, Puck's simple, spherical forms can be superimposed on top of one another, lending the whole an organic sensibility.

The Puck collection offers users a versatile ceiling light defined by its strong formal expression and warm illumination thanks to its LED light source and blown-glass diffuser. Puck combines a series of models of different compositions, all of which work off a single electrical point connection, using circles as their central leitmotif.

# Tube Free

Design by Ichiro Iwasaki.

With the Tube ceiling collection, Ichiro Iwasaki endeavours to create a lighting system capable of forming distinctive expressions by reconfiguring the different constituent parts. By combining three different diameter shades, six colour tones and a rhythm of differing heights, Tube creates a unique landscape of luminaires overhead.

# Plusminus Solo

Design by Diez Office.

Plusminus Solo introduces a collection of versatile semi-spherical luminaires that adapt to the surrounding space. Easily adjustable, the Plusminus wall range features semi-spherical directed flat diffusers in different sizes, as well as an accent spotlight for more precise illumination.

To see Plusminus collection  
go to page 272 VOL 1

Available in five elegant finishes and mounted as desired, the Plusminus Solo wall range is suitable for functional purposes, such as illuminating a transitional area by bathing a wall with soft light, as well as shaping comfortable scenes through a unique blend of diffuse and accented lighting. Combined with Plusminus Solo floor, table and ceiling luminaires the possibilities are endless.

# Tempo

Design by Lievore Altherr.

The Tempo collection reclaims our collective memory of light, distilling lighting archetypes into three basic forms: the disc, the diamond and the milk glass oval explore the interplay of opacity, translucence and transparency.

Fusing contemporary style and classic design, the collection is characterised by lean lines and a long adjustable arm that extends out from its vertical base.

The opaline diamond projects a diffused light of a romantic quality, filling a space with its inviting glow. An evolution of the classic bistro globe, the oval diffuser hangs gracefully in the air, its translucency introducing an air of tranquillity. Converting the traditional bulb into a brilliant bubble, the reflector disk embraces an industrial aesthetic. Featuring a flat graphite-coloured plate, light is reflected downwards for a compelling effect.

# Spa

Design by Ramos & Bassols.

Spa is the perfect lighting solution for any wellness space. From public dressing rooms, restaurants and spas, to private kitchens, corridors and bathrooms, its graceful simplicity and linear form allow for seamless integration within a variety of humid interiors.

The diffuser provides diffuse, glare-free, front lighting, ideal for creating an intimate atmosphere.

Vanity light

Ideal as a bathroom mirror light fixture, Spa can be positioned at an angle to send diffuse, ambient lighting in the desired direction.

IP44. Spa can be wiped down with a wet cloth for easy maintenance

Each luminaire is separated from the wall by a single aluminium support and connects to a simple terminal, invisible from the front, which lends a sense of weightlessness and essentiality to the design.

# Dots

Design by Martín Azúa.

This small scale wall sconce in the form of simple, circular dots delivers high visual impact through a range of lighting effects. Seamlessly connecting a space with an intimate landscape of beams and halos, the collection creates a melody of light like a composition of musical notes in concert with one another.

Its compact shape and coloured lacquer or natural wood finishes mean Dots can be easily integrated into any space.

4662 item with on-off switch on the back plate

Deployed alone like a sparkling jewel or in combination to create a glowing galaxy, Dots luminaires provide personalised lighting solutions for a range of uses: task lighting, graphic, directional light, and diffuse, ambient illumination.

“Dots is a simple, versatile lighting system that offers many different solutions in one collection. If we forget the idea that wall lamps are boring, we can suddenly start playing with material, colours and lighting effects in group or individually to create comfortable atmospheres”.

# Palma

Design by Antoni Arola.

The interior ambience takes on a life of its own with Palma; an unexpected design that accommodates greenery along its axis.

Palma consists of hand blown glass spheres joined together by a contemporary aluminium structure. Available in vertical and horizontal orientations and a choice of one, two or three spheres, the sconces and plantings can be combined in an array of different compositions to span a broad stretch of wall or climb upward towards the ceiling.

# Pin

Design by Ichiro Iwasaki.

A timeless proposal from Japanese designer Ichiro Iwasaki, Pin is both classic and contemporary. Characterised by a graceful stem and subtle, functional expression, it is small in scale but with exceptional lighting efficiency.

As a wall lamp, Pin features a striking interplay of geometric forms. Lean, steel lines extend outward, punctuated by a bold, circular base and aluminum dome shades. Whether displayed individually or in customised combinations, Pin functions as abstract wall art as well as a simple reading light.

# Structural

Design by Arik Levy.

Structural features cubic forms paired with slender metal rods that both join and separate its volumes. Deconstructing the source, it casts light in unexpected places, creating points of light connected in space.

The Structural wall lamp can be combined in various arrangements to integrate with a range of architectural styles and spaces. Marked by lean lines and defined coordinates, it creates glowing sculptural silhouettes. The LED-powered light source is encased in an aluminium box, bathing walls in a bright wash of light without glare.

# Set

Design by Xuclà.

Set is a new concept of modular wall sconces that composes light as art onto the walls. During the day Set decorates the wall with a pattern of rectangular elements, but once illuminated it creates a surprising play of lights, shadows and volumes.

7749

18 x 10 cm

7750

18 x 10 cm

7751

30 x 10 cm

7752

30 x 10 cm

7753

38 x 10 cm

A customised composition of rectangular pieces crafted of an aluminum body and fine borosilicate-glass diffuser, Set both generates and reflects light. It features one fixed component fitted with an LED that casts its light over the other adjustable volumes, each, in turn, emanating elegant rays of light and shadow upwards. The fixture produces an endless array of luminary effects depending on how it's positioned and doubles as dramatic wall art.

# Kontorno

Design by Sebastian Herkner.

Consisting of an elegant linear framework complemented by a cylindrical diffuser or curved reflector, the Kontorno collection envelops the light source it contains, offering diffuse, balanced illumination.

Large-scale glass wall lamp

Pure and refined, Kontorno’s cylindrical glass diffuser expresses timeless romanticism with its warm, 360-degree glow.

“Kontorno is about simplicity and balance. The light is very poetic and features a frame interacting with different shapes to generate myriad lighting moods and atmospheres.”

Sebastian Herkner.

# Guise

Design by Diez Office.

Crafted of precision-cut glass and embedded with a row of recessed LEDs, Guise explores the relationship between light and transparency. The light inside the glass appears invisible, while the delicately engraved surface generates a beautiful diffusion.

# A source of emotion

Colour is a source of emotion it can instantly set a mood, convey a feeling or generate a sense of wellbeing

Vibia’s approach to coloured light invites the use of colour and gradients to create and experience different atmospheres, making them as natural and subtle as possible. Natural light is never mono-tonal. Gradients come in infinite colours.

# Vibia Chromatica colours of light

## Static White

You can select any desired light -white, colour mood or gradient- and intensity manually from the analogic product interface. You can also integrate your selection into the control system for specific scene design and activate it using the Vibia App

## Colour Moods

Contact Vibia Support Service at [vibia.com](https://www.vibia.com) for any kind of assistance or recommendation when designing an atmosphere of wellbeing, or if you require support with control system approach.

# Cozy colour mood

Bringing warmth and glow, this hue also contains darker, moodier undertones. A deep, burned red tone in the solid colour, while a colder grey-blue tone merges with the red in the gradient.

The Guise wall sconce consists of a glass disk emitting a perimeter glow from a hidden LED light source. When switched on it generates a halo of diffuse light like a solar eclipse; when switched off, the transparent glass and hidden LEDs seem to disappear, hence its enigmatic name.

Smart: ProtoPixel\* (also with push buttons)

You can select any desired light -white, colour mood or gradient- and intensity manually from the analogic product interface.

\*ProtoPixel products are compatible with all other DALI-2 products via a designated gateway (please consult us)

# Musa

Design by Note Design Studio.

A poetic expression of light, inspired by nature. Cradled by the soft curve of Musa's bowl-shaped diffuser, light is both contained and reflected in its silky veneer.

7415  
Ø 26 x 10 cm

Musa recalls the organic form of an oyster and pearl. A small, dimmable diffuser nestles at its base, casting a soft glow that spreads across the larger sphere that contains and diffuses it.

- 23 Warm White (NCS S 0502-Y50R)
- 24 Beige M1 (NCS S 2005-Y50R)

Analog: 1-10V

# Funnel

A warm lighting presence with a distinctly sculptural form, Funnel is a study in materiality, light and space.

2012

Ø 22 cm

2013

Ø 35 cm

A fluid design defines this aluminum fixture, a streamlined, funnel-shaped base that flows into a protruding cap. The smooth, sculptural curves conceal a LED light source behind the tip, reflecting light back on the funnel form and creating a flood of indirect, ambient lighting. It can be displayed individually or in a row for greater impact.

# Suite

Design by Jordi Vilardell & Meritxell Vidal.

The Suite wall light doubles up as a convenient storage facility. Depending on the desired effect, the user can choose from a range of different models: a simple shelf, a shelf with a reading lamp, a shelf featuring a luminous object, or an ambient wall sconce. The shelves incorporate an invisible LED tucked underneath, offering an ambient bedside glow.

# I.Cono

Design by Lievore, Altherr, Molina.

Distinguished by its signature visor-shaped shade, I.Cono presents a poised, Scandinavian presence. The visual purity of its angular shade is matched by a sleek base and complemented by a range of elegant finishes.

- 10 White (NCS S 0300-N)

# Origami

Design by Ramón Esteve.

Inspired by the Japanese art of paper folding, Origami provides gentle ambient light illumination while doubling up as a striking installation. Light radiates out from a series of distinctive geometric structures, creating a dialogue of light and shadow across the wall.

- 10 White (NCS S 0300-N)
- 29 Brown D1 (NCS S 8005-Y50R)
- 38 Terra Dark (NCS S 5040-Y70R)

# Puck Wall Art

Design by Jordi Vilardell.

Puck Wall Art combines two circular wall lights of different sizes and colours, superimposed on top of one another, and combining to create a set of highly dynamic, sculptural compositions. The collection provides ambient indirect light and only requires a single electrical connection.

5486  
87 x 87 x 11 cm

5491  
103 x 84 x 11 cm

Puck Wall Art is comprised of different disks to create a warm, visually sharp and mathematically creative effect. There are four sizes of disks, allowing the designer to play with varied combinations of indirect light. The resulting design comprises a set of highly dynamic, sculptural compositions.

# North

Design by Arik Levy.

The North collection consists of a conical aluminum shade hanging from an adjustable carbon fibre rod. The rod and shade are disconnected from one another via a slim cable, directing the LED-powered light where needed in a dynamic system of adjustable parts.

5630

150 x 195 cm

For the North wall light, a slender rod rises from a base attached to the wall. The light source and shade are separated from the base, suspended delicately in mid-air from the tip of the rod. Available in four lacquered matte tones, it can be adapted to any style for both private and public use. North provides flat uniform light of a local yet flexible character.

- 10 White (NCS S 0300-N)
- 11 Black (NCS S 8500-N)
- 24 Beige M1 (NCS S 2005-Y50R)
- 42 Blue M1 (NCS S 5010-B10G)

CRI>80

**Control**  
Analog: Push

North combines pendant and wall application to provide elegant and adjustable solutions. Choose from different shade sizes for more focused or diffused illumination.

# Halo

Design by Martín Azúa.

Halo's graphic simplicity lends it an ethereal quality. The fixture seems to float in mid-air, powered by invisible LEDs hidden within its opalized, linear diffuser.

2360  
102,5 x 5,7 cm

When composed as a collection, Halo comes alive with new compositional value. Rotation around a central axis allows the light sticks to be positioned as desired, creating a luminous mural that bathes the surrounding wall in a diffuse light.

Connecting  
space application

Sticks offers a creative lighting toolkit for integrating light elements in an interior space, connecting the different architectural planes.

Connectable

The Sticks collection has three sizes: 1.5 m , 2 m, or 3 m, and they can be connected one to each other to a total maximum lenght of 6.5 meters per electrical connection.
